

Problem Solving and Performance Workshop

On-Site Customized Problem Solving and Performance Improvement Training An Empowering One or Two-Day Seminar

“We can’t solve problems by using the same kind of thinking we used when we created them”
–Albert Einstein

Not just another training expense, but an investment in raising the overall performance and leadership of individuals and teams.

In all companies, at all levels, and in all areas there are issues to deal with, things that matter to you and your organization. From new opportunities to the seemingly unsolvable irritants that affect day-to-day performance. The desire to act quickly, to get a quick return on investment, frequently leads to outcomes that have negative consequences. Workplace problem solving is complex. It requires critical thinking, a structured approach, and the right blend of creative and analytical techniques within a framework designed to deliver results.

What you will learn:

- Problem Solving and Performance Improvement Training- For improved problem solving and decision-making. A customized, interactive workshop.
- Problem Solving- is an impartial method of analyzing and looking at decisions and problems to determine how to solve them, and reach goals. The result is faster decisions, more creative and innovative solutions and higher quality results.
- A Highly Interactive Workshop- trains the participants in the fundamentals of problem solving in both interpersonal and workplace applications.
